Minor in Management

List of Core Courses (9 credits)

S.No	Courses
1	Introduction to Business & Management (MSL4010) – 3 Credits
2	Managing Digital Enterprises (MSL7140) – 2credits
3	Financial Accounting & Reporting (MSL 71040) – 2credits
4	Marketing Management-I (MSL7060) – 2credits

List of Elective Courses (6 credits)

S.No	Courses
1	Organizational Behaviour (2-0-0)
2	Statistics for Management (2-0-0)
3	Managerial Economics (2-0-0)
4	Data Management & Analysis (0-0-4[2])
5	Operations Research (2-0-0)
6	Corporate Finance-I (2-0-0)
7	Macroeconomic Environment of Business (2-0-0)
8	Business Research Methods (1-0-0)
9	Strategy Formulation (2-0-0)
10	Operations Management (2-0-0)
11	Entrepreneurial Experiences (2-0-0)
12	Business Analytics Lab-1 (0-0-2[1])
13	Global Economy (1-0-0)
14	Marketing Management-II (1-0-0)
15	Econometrics (2-0-0)
16	Legal Aspects of Business (2-0-0)
17	Managing Human Capital (2-0-0)
18	Strategy Execution (1-0-0)

*Electives will be offered as per the faculty availability.

Title	Introduction to Business and Management	Number	MSL4xxx
Department	School of Management & Entrepreneurship	L-T-P	3-0-0
Offered for	All UG (Open Elective)	Type	Elective
Prerequisite	None		

Objectives
To introduce the students to foundational concepts of management.
To introduce the students to various functional areas within business.
To contextualize the concepts with management practice in India and globally.

Learning Outcomes: After completing this course, the students will be able to:
Understand foundational concepts of management
Appreciate the relevance of various functional areas within business
To be able to analyze and apply the concept into management practice

Pedagogy
The pedagogy would be a mix of lectures, multimedia, case discussion and analysis.

Course Content
Introduction (6 lectures)
Introduction to Management and Organizations; Evolution of Management Thought, Organization Structure; Form of Organizations: Family Business, Section 8, Cooperatives, Limited Liability Partnerships, Public organization, Private Organization

Business Functions (20 lectures)
Strategy and Planning - goal setting, strategic vs operational planning, strategic management (2 lectures);
Monitoring and Controlling - the control process, types of control, measuring for organizational performance (2 lectures);
Financial Management - understanding financial statements, measuring financial performance via ratios (3 lectures);;
HumanResource Management - recruitment & selection, training, performance improvement, motivation (2 lectures);
Marketing Management - from 4P to 4Cs of marketing, introduction to digital marketing (2 lectures);
Operations Management - the operations process, enterprise resource planning, industry 4.0
(3 lectures);

Management Information Systems - information technology vs information systems, business analysis, applications of AI (3 lectures);
Technology and Innovation Management - assessing technology readiness, technology landscaping, technology forecasting, promoting and sustaining innovation (3 lectures)

Environmental Perspective (8 lectures)
Assessing External Environment; Contingency perspective; Managing Change and Disruptive Innovation

Social Perspective (8 lectures)
Corporate Social Responsibility and Ethics; Stakeholder theory; Managing in the age of technology revolution; Responding to Global Calamities (e.g. pandemic, climate change).

Course Title	Managing Digital Enterprises	Course No.	MSL7140
Department	SME	Structure(L-T-P-D C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Introducing fundamentals of Digital Enterprise
2. Discuss the technology foundation of Digital Enterprise
3. B2C and B2B digital enterprise
4. Challenges and opportunities around Digital Enterprise

Learning Outcomes

1. Develop a practical understanding of how digital enterprise operates
2. Gain an understanding of technology foundation required for digital enterprise

Contents

- Foundation of Digital Enterprise: Digitization and its impacts; Defining digital enterprise and its types; Elements of digital enterprise management; Challenges and issues; Emerging trends.
- Technology Foundation: Digital Enterprise Technology Infrastructure; Big Data and Data Analytics; Clud Computing, IoT, AI, Machine Learning; Blockchain
- Digital Enterprise Strategy Planning and Implementation: Digital Transformation; Digital Enterprise Strategy Framework; Success factors for digital enterprise; digital enterprise business model
- Strategic Perspectives: Digital Strategy; Forms of Digital Companies; Digitization and Employment; Digital Technolgy and Organization; Ethical Issues
- Operational Perspectives: B2C (E-Tailing): E-Tailing; Issues and opprtunities; B2B: B2B Digital Enterprise; Business Opportunities; Supply chain; Emerging trends
- Digital Platforms: Digital Platforms; Social Media Platforms; Challenges and business opportunities
- Digital Payment Systems: Overview of payment system; B2C and B2B payment; Mobile Payment; Challenges, issues and benefits associated with Digital Payments
- Digital Marketing: Digital Marketing; Digital Consumers; Digital Advertsing; SEO; Privacy
- E-Services: E-Health; E-Governance; E-Learning

Title	Financial Accounting and Reporting	Number	MSL71040
Department	School of Management and Entrepreneurship	L-T-P [C]	2-0-0 [2]
Offered for	MBA	Type	Core
Prerequisite	None		

Objectives

1. This course aims to help prospective consumers of corporate financial information, such as managers, stockholders, financial analysts, and creditors, about accounting fundamentals.
2. The course focuses on understanding how economic events like corporate investments, financing transactions and operating activities are recorded in the three main financial statements (i.e., the income statement, balance sheet, and statement of cash flows).

Learning Outcomes

1. Discover how balance sheets, income statements, and cash flow statements are developed and how each interacts.
2. Evaluate the financial health of a business using financial statements
3. Students will develop the technical skills needed to analyze corporate financial statements and disclosures for financial analysis.

Contents

Unit 1- Financial Accounting (4 hours)
Unit 2- Accounting Concepts, Principles, Bases and Policies (4 hours)
Unit 3- Double Entry Accounting (4 hours)
Unit 4- Ledgers (2 hours)
Unit 5-Trial Balance (3 hours)
Unit 6- Final Accounts (4 hours)
Unit 7- Cash Flow Analysis (3 hours)
Unit 8- Financial Statement Analysis (4 hours)

Textbook:

1. T. Horngren Charles, L. Sundern Gary, A. Elliott John , R. Philbrick Dann. (2017). Introduction to Financial Accounting, Pearson Education; Eleventh edition

Reference Book:

Course Title	Marketing Management - 1	Course No.	MSL7060
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Introduce the fundamentals of marketing management
2. Provide the holistic understanding of marketing within broader management activities

Learning Outcomes

1. Develop an understanding of designing a marketing strategy
2. Gain an understanding of the various constituents making marketing activity

Contents

- Understanding Marketing Management: Evolution of Marketing; Defining Marketing for the 21st Century; Marketing Strategies and Plans.
- Connecting with Customers: Creating Customer Value and Loyalty, Consumer Markets; Consumer Decision Making and Business, Government and Consumer; Global Markets.
- Marketing Strategy: Market Segmentation and Targets, Brand Positioning; Brand Equity; Brand Loyalty; Competition and Growth.
- The Marketing Mix: Product Strategy; Product Mix, Designing and Managing Services; Pricing Strategies and Programs.
- Delivering and Communicating Value: Integrated Marketing Channels; Managing Retailing, Wholesaling and Logistics; Word of Mouth; E-Word of Mouth; E-Commerce and M-Commerce.
- Digital Marketing: Managing Digital Communication; Social Media Marketing; SEO; Advertising and Digital Products

Course Title	Organizational Behaviour	Course No.	MSL7010
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Introduce important concepts in behavioral science and discuss the factors that shape individual and collective behaviors
2. Explain how individual and collective behaviors shape organizational structures and functions

Learning Outcomes

1. To understand basic concepts in behavioral science
2. To apply these concepts to learn how they shape organizational processes

Contents

- Introduction: Organizational Behavior; Theories of the Organization
- Decision-Making: Rationality; Choices; Heuristics and Biases
- Motivation: Expectancy, Needs & Values; Goal-Setting; Rewards & Punishment; Job-Design; Beyond Self-Interest
- Individual Differences: Personality Assessment; Selection & Hiring
- Groups: Team Structure, Composition, and Effectiveness
- Culture & Organizational Design: Norms, Culture, and Processes

Text Book

Course Title	Statistics of Management	Course No.	MSL7030
Department	SME	Structure (L-T-P [C])	2-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Introduce the fundamentals of data and statistics
2. Explain various types of statistical tools
3. Introduce the management applications of statistics

Learning Outcomes

1. Participants will develop working level familiarity with quantitative data and statistical techniques.
2. Participants will learn the business applications of statistics

Contents

- **Data and Statistics:** Data, Types of Data, Sources of Data, Types of Statistics, Application Domains of Data and Statistics (1 lecture)
- **Descriptive Statistics: (Tabular and Graphical Displays):** Frequency distribution, graphical representation of data & measure of central tendency, a session on excel & R (2 lectures)
- **Probability:** Introduction to Probability—Events and Probability, Basic relationships of probability, conditional probability, Bayes' Theorem; Discrete Probability Distributions; Continuous Probability Distributions; (9 lectures)
- **Sampling distribution:** Sampling and Sampling Distributions (3 lectures)
- **Statistical Inference:** Point estimation & Interval Estimation (4.5 lectures)
- **Hypothesis Tests:** Null and Alternate Hypothesis; Type 1 and Type II errors, One-tailed and Two-tailed test; Inference about Means and Proportions; Inference about population variances; Test of Independence; Goodness of fit, discuss by using R (4 lectures)
- **Experimental Design and ANOVA:** An introduction of Experimental Design and Anova; Completely randomized design; Randomized block design; Factorial Experiment, Session on R (4 lectures)
- **Regression:** Simple Linear Regression; Multiple Regression, discuss by using R & Excel (1.5 lectures)

Text Book

Course Title	Managerial Economics	Course No.	MSL7050
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Provide students with necessary analytical tools and basic economic concepts for understanding business economic environment and the managerial issues
2. Introduce the critical role of economics and managerial implications of economic analysis

Learning Outcomes

1. Equip with strong economic analytical framework for various stages of managerial decision-making processes
2. Acquire working knowledge on the managerial applications of economic analysis
3. Develop a practical applicability of economics in business.

Contents

- Introduction to managerial economics: Introduction to economy (conceptualisation, approach and functioning); Market economy vs capitalist economy; Circular flow of economy;
- Understanding Markets: Supply and demand; Market equillibrium; Market failure;Role of Government; Public goods
- Demand analysis: Determinants; Estimation and managerial uses of elasticity of demand; Demand forecasting; Utility functions and indifference curves; Marginal rate of substitution; Utility maximization; Giffrin good
- Production and cost analysis: Determinants; Production Functions; Cost of Production; Profit maximization; opportunity cost; Production Efficiency Analysis; Price elasticity of supply
- Market and competition: Pricing and output under different market situations: Perfect competition; Monopolistic competition; Monopoly; Oligopoly and cartels; Market power
- Game Theory: Game theory; Payoffs, Game theory strategy

	Title	**Data Management & Analysis Using Spreadsheets**	**Number**	**MSP7060**
	Department	**School of Management & Entrepreneurship**	**L-T-P [C]**	**0-0-4 [2]**
	Offered for	**MBA**	**Type**	**Core**
	Prerequisite	**None**		

Objectives

The course will help students to:

1.

rganize and manage data using MS Excel

2.

nderstand various data analysis methods

3.

nderstand spreadsheet modeling to solve business problems

Learning Outcomes

The students are expected to have the ability to:

1.

nderstand various data analysis tools to organize, summarize and analyze data

2.

now how to frame problems and integrate various analytical skills to model and solve business problems

3.

ncrease their competency in using spreadsheet application (MS Excel) as analysis, modelling, and management reporting tool

Contents

Organizing Data (6 hours)

- Entering data- various formats
- Cell referencing and naming cells & ranges
- Basic functions and operations- filtering, sorting, sub-totals
- Searching - using LOOKUP functions

Summarizing and Visualising Data (5 hours)

- IF Functions - COUNTIF, SUMIF, AVERAGEIF
- Using a pivot table, slicers and timelines
- Using charts and sparklines
- Conditional formatting

Data Analysis-1: Statistics and Data Analysis Tool Pack (5 hours)

- Descriptive statistics
- Frequency distributions
- Regression analysis

Data Analysis-2: What-if and Financial Analysis (5 hours)

- Financial analysis
- Sensitivity analysis using data tables
- Goal seek and scenarios

Spreadsheet Modeling and Advance Features (7 hours)

- Solver
- Creating and running a Macro

- Power Pivot
- Creating Dashboards

Title	**Operations Research**	**Number**	**MSL71060**
Department	**SME**	**Structure (L-T-P-D [C])**	**2-0-0-0 [2]**
Offered for	**MBA 1st Year**	**Type**	**Core**
Prerequisite			

Objectives

1. To understand the process of decision problem formulation
2. To provide an overview of operations research techniques for effective decisions–making
3. Explain model formulation and applications that are used in solving business decision problems

Learning Outcomes

1. To criticize constructively and determine existing issues with the use of statistical methods
2. A basic understanding of quantitative techniques used to help manage business, industrial and organizational operations and projects.
3. An appreciation of the use of a mathematical optimization model as a way of encapsulating and analyzing a complex situation

Contents

- Linear Programming: Introduction, Graphics method, Simplex method, Artificial Variables, Special Cases, Excel Solver for LP, duality theory, sensitivity analysis
- Network Optimization: Transportation models, Assignment methods;
- Graph and Network Theory: Shortest Path Method, Maximum Flow Problem and Minimum Spanning Tree and its LP Formulation Network models (Shortest path problem, Maximum flow problem, Minimum Spanning Tree)
- Integer Programming: Integer linear programming, Solving IP Problem, Application of linear programming

Title	**Corporate Finance-I**	**Number**	**MSL7130**
Department	**SME**	**Structure (L-T-P-D [C])**	**2-0-0-0 [2]**
Offered for	**MBA 1st Year**	**Type**	**Core**
Prerequisite	**None**		

Objectives

1. This course enables the students to solve financial management problems at corporate level using relevant principles and approaches
2. An understanding of the business environment, the role of corporation and its interaction with financial markets is the desired outcome
3. Student should be able to compare and evaluate various managerial decisions and its impact on the firm value

Learning Outcomes

1. The students are expected to have the ability to:
2. Comprehensive use of finance for decision-making process
3. Understands Capital requirements and how companies managing working capital and short-term decision
4. To evaluate alternative techniques for analyzing project opportunities and make capital budgeting decisions (long tern decisions)

Contents

4. Financial Management: Goals and Functions of Finance, Financial Planning and Forecasting
5. Working Capital Management: Operating cycle, Cash management, Receivable and Inventory management
6. Time value of money: Concepts
7. Capital Budgeting Decisions: Techniques, Project cash flow, Capital Rationing, Cost of Capital, Valuation of Securities
8. Leverage Analysis: Operating and Financial leverage
9. Introduction of Financial Market: Money Market and Capital market: Primary Market and Secondary market, Derivative market, Bond Market
10. An Analysis of Financial Market: Capital Assets Pricing Model & Risk- Return analysis

Textbook

1. Brealey, R.A., Myers, S.C., Allen, F. and Mohanty, P. 2018. *Principles of Corporate Finance*, 12th Edition, McGraw Hill Education

Course Title	**Macroeconomic Environment of Business**	**Course No.**	**MSL7070**
Department	**SME**	**Structure(L-T-P-D [C])**	**2-0-0-0 [2]**
Offered for	**MBA 1st Year**	**Type**	**Core**
Prerequisite	**None**		

Objectives

1. Introducing macroeconomic environment of business
2. Providing with an understanding of the world economy and its implication for Indian business
3. Discussing various macroeconomic policies relevant for the business decision making

Learning Outcomes

1. Develop a sound understanding and analytical lenses of Indian and Global Economic structure as well as the latest development
2. Understand macroeconomic, fiscal, and monetary policies and their business implications

Contents

- Introduction to macroeconomics: Introduction to macroeconomic environment of business; Essential concepts and theories of macroeconomics; Introduction of macroeconomic policies; World economy and (de-) globalisation; Structural shift of the global economy
- Macroeconomic measurement: Economic Growth and development; Measurement of macroeconomic performance (GDP, GNP, NNP); Inequality
- Macroeconomic theory: Classical macroeconomic theory; Solow growth model; Keynesian Model Income determination; IS-LM model
- Business cycles and crisis episodes: Theories and concepts of business cycles; Great Depression of 1930s; South East Asian Crisis of 90s, Sub-prime Crisis of 2007-9; Euro crisis and Fiscal Sustainability; the COVID-19 induced recession
- Fiscal Policy: Government Budget; Taxtation; Fiscal Policy and its managerial implications to the industry
- Monetary Policy: Inflation; Quantitative Easing; Interest rate movements; Exchange rates; IMF; Monetary policy analysis and its implications to industry
- Trading and Financial System: Balance of Payments; GATT and WTO; Birateral and regional trade; Finance, trade and investment; free trade; export promotion; international finance
- Unemployment: Measuring unemployment; Theories and concepts of unemployment
- Indian Economy: India's integration to the global economy; Economic reforms and growth pattern of Indian economy; Fiscal policy; Monetary policy; Industrial policy; Competition policy; WTO, RTAs and India

Course Title	Business Research Methods	Course No.	MSL7080
Department	SME	Structure (L-T-P-D [C])	1-0-0-0 [1]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Introduce fundamentals of research
2. Explain various types of research methods
3. Introduce different tools and techniques of doing business research
4. Introduce business research report writing

Learning Outcomes

1. Understand research process
2. Identify business problems faced by the company and provide solutions based on a business research
3. Learn business research report writing

Contents

- Introduction to Business Research: Business Research, Process of conducting Business Research
- Research Design: Research Methodology, Types of Research Designs
- Quantitative Research Methods: Quantitative research techniques; Questionnaire designing; Sampling.
- Qualitative Research Methods: Focus Group, Participant and Non-Participant Observation, Interviews, Case Study, Insights from Textual Data
- Business Research Reporting: Writing a business research—structure and contents of a business research report
- Emerging issues in Research: Research methods in the digital era, ethical issues, and emerging business problems.

Course Title	Strategy Formulation	Course No.	MSL7160
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. To explain and understand the concept of Strategy, trace its origin and map its evolution, key approaches along with perspectives
2. Analyzing a business organization and its external and internal environment, various key constituents impacting on the organization, frameworks and tool of analysis
3. Delineation of industry structure and identifying the industry the organization belongs to, the competitive positioning, strength and weakness of the organization, a holistic view of the strategic management process and strategy formulation
4. To have an in depth insight of formulation of Corporate Strategy, Business Level Strategy and Functional Strategies

Learning Outcomes

1. Participants would be able to get a working understanding of formulating various levels of strategies for an organization
2. Understanding of industry structure and ways to augment the competitive position

Contents

- Introduction to the concept of Strategy: Historical origin and realm of Strategy, Thought Leaders perspectives and approaches as they evolved, the entry of consulting firms and their contributions, the industrial organization model, Porter's generic strategies, resource based view, sustainability of competitive advantage and dynamic capabilities, the schools of strategic thoughts: a summing up
- Fundamentals of Strategy Formulation: various aspects of formulation of winning strategies, the process, defining the environment of an organization: external and internal and delineating strength and weakness and alignment with strategic vision
- Industry Structure: An analysis of Industry structure and the competitive position of the organization
- The Corporate strategy: The scope of the firm and its boundaries
- The Business Level strategy: How to compete in a business? generic grid of costs leadership and differentiation, focused differentiation and focused costs leader: Value creation and building blocks
- The Functional strategies: learning effects, efficiency, quality and innovation

Course Title	**Operations Management**	**Course No.**	**MSL7180**
Department	**SME**	**Structure (L-T-P [C])**	**2-0-0 [2]**
Offered for	**MBA 1st Year**	**Type**	**Core**
Prerequisite	**None**		

Objectives

1. Introduce concepts of the management of business processes and how operations provide a competitive advantage in the marketplace
2. Introduce the issues related to designing and managing operations such as project management, strategic capacity planning, process analysis, production process, facility layouts, etc.
3. Introduce the supply chain and associated decisions in business environments

Learning Outcomes

1. Demonstrate comprehension of the business operations and their role within an organization
2. Identify important factors in designing, managing, and controlling business processes and how to improve.
3. Demonstrate understanding of the relationship of the organizations within the supply chain and the role of planning, information sharing, and forecasting

Contents

Introduction: Operations Management, Competitiveness and operations strategy, Forecasting

Designing Operations: Product and process design, location and layout decisions, Quality management, work design and measurement

Managing Operations: Supply chain management, Inventory management, aggregate planning and master scheduling, MRP and ERP, JIT and lean operations

Quantitative Modules: Decision modeling, Queuing model

Text Book

1. Stevenson W J, (2018), Operations Management, 13th Edition, McGraw Hill Education

Course Title	Entrepreneurial Experiences	Course No.	MSL7190
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. Understand the skills, attitudes, traits and drive required to take the path of entrepreneurship
2. Identify ones-own strengths and weaknesses matching the profiles of successful new-age entrepreneurs
3. Develop skills and shape one's personality to become an entrepreneur by addressing weaknesses and capitalizing on strengths to increase the potential to succeed in business
4. Understand market requirements concerning viable business ideas
5. Match potentially viable business idea to a personal profile

Learning Outcomes

1. To understand personal strengths and weaknesses as a potential entrepreneur
2. To gain more in-depth knowledge about the traits and characteristics of entrepreneurs
3. To learn the art of capitalizing on strengths and overcoming weaknesses

Contents

- Introduction: Definition of business and evolution of entrepreneurship.
- Personal Evaluation as an entrepreneur: Defining "success", Entrepreneurial attributes, traits, skills for success, Self-assessment, Self-development plans.
- Cases on Entrepreneurial Behaviour: Known entrepreneurial traits, Leader v/s entrepreneur, Motivation, Risk-taking ability, Personal-potential as an entrepreneur.

Course Title	Business Analytics Lab-1	Course No.	MSP7070
Department	SME	Structure (L-T-P [C])	0-0-2 [1]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

- To provide a hands-on working familiarity with R Studio
- To introduce the analytics structure of R and its applications for businesses

Learning Outcomes

- Working with R Studio for advanced business analytics
- Solving business problems with the application of analytics in R

Contents

- Introduction to R platform: R Studio, R Basics; Data Structures in R; Programming Structure in R; Graphical User Interface (GUI) (3 hours)

- Hands-on with R: Packages and Functions in R; Importing Data – Input/Output Management; Data Preparation (3 hours)

- Analytics in R: Exploratory Data Analysis; Descriptive Analytics with R; Predictive Analytics with R; Graphics and Visual Presentations in R; Introduction to GGPPLOT2 (5 hours)

- Applications of R (with Business Cases): Big Data Analytics; Visualization; Social Media Analytics (3 hours)

Course Title	Econometrics	Course No.	MSL7170
Department	SME	Structure (L-T-P-D [C])	2-0-0-0 [2]
Offered for	MBA 1st Year	Type	Core
Prerequisite	None		

Objectives

1. To explain the significance of quantitative economics in the managerial decision making
2. To introduce students to different econometric techniques

Learning Outcomes

1. They will be able to understand quantitative aspects of economics and related disciplines and
2. By the end of the course they will be able to implement them in their own specific problems

Contents

- Introduction: Introduction to Econometrics; Simple linear regression model; Multiple linear regression model.
- Linear Regression Model: linear regression model and hypothesis testing
- Multiple Regression Model: Multiple regression model and hypothesis testing
- Extensions to Multiple regression model: Dummy Variables, Specification errors, multi-co linearity, Heteroscedasticity, Nonlinear and discrete independent variables, Misspecification
- Time series: Panel Data Models, Autocorrelation function and linear stationary models, Trends and Volatility, Multiple Time series models.
- Endogenous variables: Instrumental variables & 2SLS procedure
